Portfolio website | Personal | Private | AL

To DO

- At least 1 more font for headings
- ACTIVATE FORM
- SRI key
- Write a readme for the project
- According to the specs, get the documentation in order
- Create git log document

+ Add another card

In Progress

- Bigger line height for the text areas
 - All measurements responsive where appropriate
 - The smaller the screen size, the bigger the text field

+ Add another card

Done

- Make mockups
- Hamburger menu
 - Code resume
 - Code projects
 - Put in comments to HTML and CSS
 - Icons to each project
 - Include copyright
 - Copyright line: figure out why so high on index and contact pages
 - Refactor contact.scss - fonts

+ Add another card

If I have time

- Make the nav menu show what page is the user on
 - Projects: icons to be aligned next to images
 - Increase line hight in text
 - Animation for the landing page
 - Make hamburger turn into closed icon when the menu is down
 - Animation on drop-down menu

+ Add another card

Discarded

- Footer with socials if I have time?
- Media queries - all pages

+ Add another card

Landing page IRL

The image displays three side-by-side screenshots of a mobile website for "ana-lastoviria.netlify.app".

Screenshot 1 (Left): Shows the homepage featuring a large image of pink flowers. Overlaid text reads "Ana Lastoviria" and "a Web Developer based in Melbourne, Australia". A "View My Works" button is visible. The footer contains social media links (LinkedIn, Twitter, GitHub, Email) and navigation links: Home, About, Projects, Blog, Resume, Contact.

Screenshot 2 (Middle): Shows a different section of the site with the same header and "View My Works" button. The main content area displays "Ana Lastoviria" and "a Web Developer based in Melbourne, Australia". The footer is identical to the first screenshot.

Screenshot 3 (Right): Shows another section of the site with the same header and "View My Works" button. The main content area displays "About", "Projects", "Blog", "Resume", and "Contact". The footer is identical to the first screenshot.

About mockups

Picture

About me

Hi! My name is Ana. I'm an aspiring Web-Dev based in Melbourne, Australia.

I'm Ana, a Web Developer in the making at Coder Academy.

I am passionate about technology, bringing positive change to the future, as well as increasing diversity and inclusivity in tech.

Before I got into Web Development, I used to be a singing teacher by day and a hotel worker by night. I also did - and still do! - sing in an indie-hiphop band Renelophus.

If I get free time, I choose to hang out with my cats, watch movies or play games. When the weather is nice I like go to the beach and make sand animals.

If you have any questions, want to work together or just say g'day, feel free to

Projects mockups

Responsive card layout for mobile, image below text

A screenshot of a desktop browser showing a project page. The page has a header with social media links and a navigation menu. Below the header, there are two separate card-like sections, each labeled "Project #1" and "Project #2". Each card contains some placeholder text, a large square image with an 'X' through it, and a set of four small icons representing technology. A callout box with an arrow points to these icons, labeled "Icons representing the tech used".

Separate “cards” for each project w/ description and images

To make the things more engaging and readable

Two screenshots of mobile devices (an iPhone and an iPad) displaying the same project page. The layout is responsive, adapting to the smaller screen size. Each device shows two cards, "Project #1" and "Project #2", each with placeholder text, a large square image with an 'X' through it, and a set of four small icons representing technology. The iPad screenshot includes a callout box pointing to the icons, labeled "Icons representing the tech used".

Resume IRL

The image displays three screenshots of a resume website, likely from a mobile device, illustrating the layout and design of the page.

Screenshot 1 (Left): Shows the main resume page. It features a header with social media links (LinkedIn, Twitter, GitHub, Email) and a navigation bar with links to Home, About, Projects, Blog, Resume (which is highlighted), and Contact. Below the header is a section titled "Resume" with the heading "My skills:" followed by icons for HTML5, CSS3, Sass, Git, and Ruby on Rails. A text block states: "At the moment, I'm working on mastering the Coder Academy bootcamp programme, which includes more **Ruby, Rails, JavaScript and MERN stack**. By mid 2021 I will be able to use all of those technologies at a professional level." At the bottom are buttons for "Resume" and "Questions?", and a "Get In Touch!" button.

Screenshot 2 (Middle): Shows a zoomed-in view of the "My skills:" section. A purple callout box with the text "Icons wrap nicely with Flexbox" points to the row of icons. The icons are arranged horizontally and appear to wrap onto a new line, demonstrating the use of Flexbox.

Screenshot 3 (Right): Shows a larger portion of the page. It includes a sidebar with a list of technologies: "bootcamp programme, which includes more **Ruby, Rails, JavaScript and MERN stack**". Below this is a large text block: "I came to Tech from being a music teacher and a customer service worker for years, and took a number of **soft skills** with me. Details can be learned from **my full resume**, which is viewable and downloadable here:". At the bottom are buttons for "Resume", "Questions?", and "Get In Touch!".

Contact mockups

The image displays three contact form mockups: a desktop browser window, a smartphone screen, and a tablet screen. Each mockup shows a simple functional form with fields for Name, Email, and Message, along with a Submit button. Arrows point from the desktop and smartphone forms to a central callout box containing descriptive text.

Simple functional form with labels, input fields and submit button

Takeaways

- ❖ The website is not perfectly how I want it to be, but functional, comprehensive and okay for now.
- ❖ Challenges:
 - design
 - HTML/CSS limit
 - compatibility issues with older devices
- ❖ Favourite part: SASS 
- ❖ Building the website felt empowering and not as scary as it felt at first!
- ❖ I have great front end project under my belt to demonstrate my skills and potentially get hired 

Thanks for watching 😊
